## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. '878 in view of Hafner et al.

Yamamoto et al. disclose, inherently teach, or make obvious all of the limitations of the claims except the specifics of the network.

Hafner et al. teach a similar system utilizing a network 30 for transmitting information such as inventory and sales information (Col. 5, lines 25-26).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Yamamoto et al. to use a specific network, as taught by Hafner et al., in order to provide a means for sending data to desired locations (for example, to an "inventory activity file"; See Hafner et al., Col. 5, line 33) as is well known in the art of networks.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
